

Whose Responsibility Is It?

After an accident has occurred, it is not unusual for those who were around the injured worker to feel guilty. This guilt is part of each person's inner awareness that there was possibly something they could or should have done to prevent the accident. Sometimes the accident is the result of someone else's mistakes. But who causes the accident is not as important as who is responsible for the accident, and what steps will be taken to correct future similar accidents from happening. The following is a partial list of responsibilities for safety on the job.

Guide for Discussion

Who's Responsible? (Discussion Points)

- Senior company management?
- Crew supervisor?
- Each person on the job?
- Trained safety professionals?
- Company safety committee?

Some Responsibility Rules for Everyone

If it's unsafe for you then it's unsafe for the next person and the hazard should be corrected.

Safety doesn't belong to any one construction craft; rather it is part of every construction craft to be responsible.

If safety doesn't begin with you, it won't begin at all.

An Individual's Responsibility

- To yourself
- To your family
- To your co-workers
- To your company

Additional Discussion Notes: (See Pages 6A and 6B)

Remember: Workers' compensation checks won't pay all the bills nor will they replace the self-esteem one has from being a good provider to their families. Without complete cooperation from everyone on the worksite, it just will not be as safe as it should be.

Why such emphasis on Supervisors?

WAC 296-800-14020

The employer shall instruct each employee in the recognition and avoidance of unsafe conditions and the regulations applicable to his/her work environment to control or eliminate any hazards or other exposure to illness or injury.

Past WISHA rulings have indicated that:

“Any supervisor or persons in charge of work are held to be agents of the employer in the discharge of their authorized duties.”

Authorized duties include:

- (a) The execution in a safe manner of the work under their supervision;
- (b) The safe conduct of their crew while under their supervision; and
- (c) The safety of all workers under their supervision.”

It makes good sense to hold supervisors responsible for the employees placed under their charge. It builds a sense of teamwork and shared responsibility for safe productivity. Supervisors are generally closer to the employees under their charge and better able to positively influence positive behavioral change.
